### Dec-Feb

Restaurant Season Closure

Remember to bring a torch (or mobile phone torch light) to dinner to assist walking back after dark.

## CHECK-IN / CHECK-OUT

Check-in time is from 2:00pm daily.

Check-out time is by 10:00am on your day of departure.

Please settle your bill at Reception. All outstanding items on your account will be charged to your card.

## SELF GUIDED WALKS, HIKES & TOURS

Visitor guides, maps and walking trail brochures are available from Reception. For tour enquiries, please speak to our team.

## ESKY & THERMOS

Ice is available to purchase from the Kiosk or in Tom Price.

You are welcome to fill your thermos at the hot water station in Reception.

## SOLAR POWER

Karijini Eco Retreat operates a large array of solar panels to produce electricity and hot water, and utilises backup generators when required. Power is limited in the Eco Tents and Eco Cabins to conserve energy and allows guests to switch off and slip into relaxation in the peaceful surrounds. Our hybrid system saves approximately 200 tonnes of CO2 emissions per year.

At night we recommend you turn any interior lights off while not inside your tent/cabin, to prevent insects attracted to the light.

## WATER

Please use water sparingly. Water is a precious resource in our remote location that needs to be conserved. We source our water from rainwater and onsite bores and monitor the Retreat's water usage daily.

The water from the taps is drinkable, bottled water is also available for purchase at the kiosk.

Washing of vehicles is prohibited.

Solar hot water temperature is supplied by the sun and can be affected by weather conditions, so we are unable to guarantee hot showers.

We have our own environmentally friendly wastewater plant, that enables us to use the grey water to rejuvenate our native bushland. The system is occupied by frogs which indicates it is working as it should. If you find a frog in your toilet, you can safely flush it back down.

## PLANTS & WILDLIFE

Please protect the plants, wildlife and termite mounds, do not walk or drive on the spinifex or pick flowers. Park in the designated areas. Do not exceed the cleared area of your site. Look out for snakes, even at night, and please keep our dingoes wild, so do not feed them or approach them. Insects and spiders are a natural part of our environment.

## SPEED LIMIT

Please drive slowly. The speed limit within the Retreat is 10km per hour.

## GENERATOR USAGE

4:00pm – 8:00pm only. These limited hours are in place to ensure the comfort and quiet enjoyment of all guests.

## NOISE CURFEW

No noise after 9:30pm. Please respect other guests. Managers may evict guests, without refund, who do not abide by this rule.

## RUBBISH

Due to the vast size and remoteness of the Karijini National Park, there are no bins and no rubbish removal service at the Retreat or in the Park. Please protect your rubbish from dingoes, monitor lizards, snakes and crows. **Please take your rubbish with you on departure and dispose of responsibly.** Leave nothing but your footprints! We also take our own rubbish out of the Park, use sustainable and recycled materials, have removed plastics where possible, and have a commitment to the DBCA to limit the waste the Retreat produces.

## NO CAMPFIRE

Ground fires and solid fuel fires are prohibited in the Karijini National Park due to the high risk of bushfire. Use the gas barbeques provided, or your own portable cooking appliance.

## PERSONAL SAFETY

Take care in the gorges and look after each other. Heed the signs, be aware of the trail classifications and assess your fitness and ability. Carry plenty of drinking water and stay hydrated. Wear a hat and sunscreen, get wet to stay cool and find shade. Do not take glass or alcohol into the gorges. Leave the gorge immediately if it starts to rain due to the risk of slippery rocks and dangerous flash floods. Stay back from cliff edges and stay on established trails. The DBCA may decide to close roads and gorges due to inclement weather, or where deemed necessary.
